Querying examples from knowledge base

Possible next steps:

- A. Put the glass tray in the oven
- B. Put the metal tray in the oven
- C. Put the plastic tray in the oven

Plastic bowls are not suitable for direct heating in an oven, but using either a glass tray or a metal tray is a valid choice.

A and B are both possible option! What do you think?

Let's use the glass tray!

Knowledge base

Scene: a metal bowl, a plastic bowl, and a cooktop

Put the bowl on the cooktop, please.

Possible next steps:

- A. Put the metal bowl on the cooktop
- B. Put the plastic bowl on the cooktop

A is the only possible option.

Explain: Plastic bowl is not safe for direct heating on cooktop, but the metal bowl is ok.
